

IN THE CLAIMS:

Please cancel claims 40 and 41 without prejudice or disclaimer, and amend claims 30 and 65 as follows:

c-1

30. (Amended) A cosmetic or dermatological composition comprising, in a cosmetically or dermatologically acceptable medium, at least one grafted silicone polymer having a polysiloxane skeleton grafted with non-silicone organic monomers and at least one aqueous dispersion of insoluble particles of at least one cationic polymer,

wherein said at least one grafted silicone polymer comprises, on the main silicone chain, at least one organic group of anionic nature obtained by radical (homo) polymerization of at least one anionic unsaturated carboxylic acid monomer, partially or totally neutralized in the form of a salt, and

wherein said at least one grafted silicone polymer is chosen from silicone polymers containing at least one unit of formula (I):

in which:

- G₁ independently represents hydrogen or a C₁-C₁₀ alkyl radical or a phenyl radical;
- G₂ independently represents a C₁-C₁₀ alkylene group;

- C 1
- G_3 represents a polymer residue from the (homo)polymerization of at least one anionic monomer containing ethylenic unsaturation;
 - G_4 represents a polymer residue from the (homo)polymerization of at least one hydrophobic monomer containing ethylenic unsaturation;
 - m and n are equal to 0 or 1;
 - a is an integer ranging from 0 to 50;
 - b is an integer ranging from 10 to 350; and
 - c is an integer ranging from 0 to 50; wherein either a or c is not 0.

2 2

65. (Amended) A non-therapeutic process for treating a keratin substance comprising:

applying to said keratin substance a composition comprising, in a cosmetically or dermatologically acceptable medium, at least one grafted silicone polymer having a polysiloxane skeleton grafted with non-silicone organic monomers and at least one aqueous dispersion of insoluble particles of at least one cationic polymer;

optionally rinsing with water;

wherein said at least one grafted silicone polymer comprises, on the main silicone chain, at least one organic group of anionic nature obtained by radical (homo) polymerization of at least one anionic unsaturated carboxylic acid monomer, partially or totally neutralized in the form of a salt, and

wherein said at least one grafted silicone polymer is chosen from silicone polymers containing at least one unit of formula (I):

in which:

- G₁ independently represents hydrogen or a C₁-C₁₀ alkyl radical or a phenyl radical;
- G₂ independently represents a C₁-C₁₀ alkylene group;
- G₃ represents a polymer residue from the (homo)polymerization of at least one anionic monomer containing ethylenic unsaturation;
- G₄ represents a polymer residue from the (homo)polymerization of at least one hydrophobic monomer containing ethylenic unsaturation;
- m and n are equal to 0 or 1;
- a is an integer ranging from 0 to 50;
- b is an integer ranging from 10 to 350; and
- ~~c is an integer ranging from 0 to 50; wherein either a or c is not 0.~~

REMARKS

I. Status of the claims

Claims 30-39 and 42-67 are pending and stand rejected. Claims 40 and 41 have been canceled without prejudice to or disclaimer of the subject matter recited therein, and claim 30 has been amended to more particularly point out and distinctly define the claimed invention. Specifically, claim 30 has been amended to clarify the
